

KÄRCHER T 12/1 eco!efficiency

The new Kärcher T 12/1 eco!efficiency is a highly efficient and quiet vacuum cleaner which is particularly suitable for contract cleaners, hotels and restaurants, offices, shops, hospitals as well as private households. The unit has a convenient step-on switch for ease of operation and features two back wheels and two front castors for maximum manoeuvrability. All together a powerful and robust middle class dry vacuum cleaner.

Standard equipped with a high effective fleece filter bag, which allows an up to three times higher filter bag volume in contrast to a paper filter bag. This is a benefit that pays for itself since the operating periods between filter bag changes are longer.

The T 12/1 eco!efficiency motor performance, air flow and the 6-stage filter system (incl. microfilter as special option) have been designed in such a way that there is hardly any loss of suction power.

Its low centre of gravity provides stability. The power cable can be wound up onto the cable storage recess or onto a pull-out cable hook as a fast storage when changing the location, e.g. cleaning objects in hotels, etc.

Special feature: the floor tool plugs into the accessory holder (on the back of the unit) and can be used as a complete accessory fixation at the machine after working.

The suction hose on the unit has a simple but effective plug-in clip system. You push the hose on to the unit's intake stub, a resilient ring engages – that's all. This system ensures that the suction hose does not become detached when the unit is pulled along behind the user.

The machine provides **energy savings of up to 40% at almost the same cleaning performance as T 12/1**. In addition, the machine has an extremely low noise level with **56 dB (A)**, which allows you to work in noise-sensitive areas.

Standard accessories

Plastic container material
Floor tool
Clip system for extension hose
Fleece filter bag
2 x 0.5 m Metal suction tube
2,5 m Suction hose
Safety class II
285mm Switchable floor nozzle
Washable nylon filter (main filter)

Part no. **1.355-113.0**

TECHNICAL SPECIFICATIONS

Dimensions (L x W x H)	340 x 315 x 410 mm
Max. intake performance	max. 750 W
Container capacity	12 l
Frequency	50-60 Hz
Weight	6,6 kg
Length of cord access.	12 m
Power rating fan	750 W
Air flow rate	43 l/s
Sound pressure level	56 dBA
Voltage	220-240 V
Standard nominal width	32 mm
Vacuum	229/22,9 mbar/kPa
