

## KÄRCHER HD 6/15-4 Classic

The HD 6/15-4 Classic cold water high-pressure cleaner is extremely robust, user friendly and offers a maximum operating pressure of 150 bar at a water flow rate of 600 litres per hour/h. The HD 6/15-4 Classic has been designed for tough daily operating conditions with an air cooled 4-pole electric motor, which operates at 1400 rpm and a powerful and reliable crankshaft pump with ceramic pistons.

### Features:

#### 1. LONGEVITY

- 4-pole electric motor
- Brass cylinder head with ceramic pistons
- Reliable crankshaft pump

#### 2. EASE OF USE

- Swiveling cover for easy access during maintenance & service
- Infinitely adjustable water flow rate at the pump
- Easily accessible ON/OFF-switch

#### 3. MOBILITY

- Large wheels
- Tilting aid on the machine rear
- Foldable handle for space-saving storage
- Compact measurements and low gross weight

#### 4. STORAGE

- Storage compartment for nozzles etc.
- Pivoting hooks for convenient power cord storage
- Robust metal frame chassis with integrated hose and spray lance bracket

#### 5. EFFICIENCY

- Total-Stop device for energy-saving machine operation
- Includes accessories (HP hose, trigger gun, lance, power nozzle)
- Power nozzle for superior cleaning results

#### 6. SERVICEABILITY

- Wide opening cover provides excellent access to all relevant components
- Large fine-mesh water filter ensures optimal protection of the pump
- Good visible oil gauge glass

### Standard Features / Accessories

- 10 m High-pressure hose
- Trigger gun
- 850 mm Stainless steel spray lance
- Power nozzle 25°

Part no. 1.367-306.0

### TECHNICAL SPECIFICATIONS

Connected load	3,4 kW
Dimensions (L x W x H)	700 x 455 x 1010 mm
Max. Water feed temperature	60 °C
Pressure	70-150/7-15 bar/MPa
Voltage	230 V
Frequency	50 Hz
Water flow rate	450-600 l/h
Weight	52 kg
