

Stand-alone version

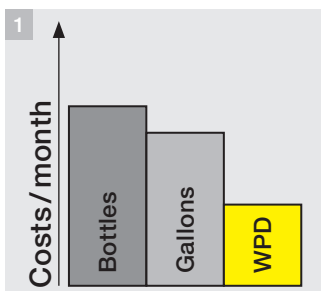

Table top version

Compact and affordable.

The compact WPD 50 water dispenser has everything that a water dispenser should have. It dispenses ambient and chilled water. An active carbon filter provides a better taste. The UV lamp destroys bacteria and viruses. Intuitive buttons and icons ensure easy operation.

1 Economical drinking pleasure

- Basic features: chilled and ambient water.
- No handling and transport costs compared with gallon and bottled water.
- More space available for things more important than gallon bottles.
- Cost-effective.

3 Modern design

- Ideal for small installation locations when space is limited.
- Intuitive operation thanks to clearly identifiable buttons.
- Clearly recognisable water dispensing area for optimal positioning of the drinking vessel.

2 The purest water combined with safety

- The active carbon filter ensures a pure taste by removing chlorine and heavy metals from tap water.
- UV lamp destroys bacteria and viruses.
- Chemical disinfection of all water-conducting lines, the cooling module and the water dispensing valve.

4 Self-service possible

- Easy access to all components allows self-service.
- Self-service saves unnecessary service work, which also saves money.

WPD 50
